

Chi-kwadraattabel

Onderstaande tabel bevat de kritieke waarden (stippellijn, uitgedrukt in χ^2) voor de chi-kwadraattoets met verschillende vrijheidsgraden (vg) en significantieniveaus (sn). In de verdelingen, met op de horizontale as χ^2 en op de verticale as de kansdichtheid, is alfa gearceerd.

sn \ vg	0,1	0,05	0,025	0,01
1	2,70554 	3,84146 	5,02389 	6,63490 
2	4,60517 	5,99147 	7,37776 	9,21034
